Summary

Full-stack software engineer with a background spanning consulting and university research. Over 4 years, I've built everything from internal tooling and RESTful APIs to enterprise SaaS platforms and AI-assisted data pipelines — leveraging cloud platforms like AWS and GCP to ship reliable, scalable software.

Professional Experience

Senior Consultant, Full-Stack Software Engineer

July 2026 - Present

Infinitive, Ashburn, VA

- Designed and developed features for Capital One's internal insights application
- Used TypeScript and React to develop front-end and back-end pages and features for product teams

Senior Full-Stack Software Developer

July 2025 - July 2026

Nessan Technologies, Remote

- Built a full-stack executive intelligence platform using Next.js, React, TypeScript, Tailwind, and shadcn/ui, including complex UI components such as expandable data tables, advanced filtering, and CSV export functionality.
- Designed and integrated a serverless backend on Google Cloud Functions, implementing structured JSON APIs, environment variable management, and seamless communication between the frontend and cloud backend.
- Integrated Vertex AI and Gemini into the data pipeline to perform AI-assisted web scraping and fact-grounding using Google Search, enabling automated enrichment and verification of data.

Consultant, Full-Stack Software Engineer

Jan 2025 - June 2025

Infinitive, Ashburn, VA

- Designed and developed features for Capital One Software's Slingshot application, a cloud data platform for monitoring and optimizing Snowflake and Databricks resources
- Used TypeScript and React to develop front-end and back-end pages and features centered around serverless Databricks and adaptive warehouses in Snowflake.
- Used PostgreSQL, ClickHouse, and Snowflake to develop views

Junior Software Developer

Jan 2024 - Jan 2025

Nessan Technologies, Remote

- Created and maintained databases with data aggregated from multiple data sources. Giving users of the database a 150% increase in search efficiency.
- Used AWS Lambda functions, and later on Google Cloud Functions, to remove 90% of operational costs and increase uptime by 40%.
- Utilized Python and MySQL to create and maintain databases.
- Used multiple third-party APIs to gather and maintain data to reduce development time by 80%.

Software Developer

July 2022 - Jan 2024

University of Maryland Institute for Advanced Computer Studies, College Park, MD

- Engineered a robust internal software solution using Python and Django Framework; streamlined workflow processes, reducing manual data entry by 60% and saving the team 50 hours per month.
- Utilized Git and GitLab for version control and collaborative code management to achieve a 100% reduction in time to production.
- Maintained relational databases to store and retrieve data efficiently.

Backend Developer Intern,

May 2022 - July 2022

HorizonLabs, Remote

- Developed and deployed RESTful APIs using FastAPI and Python, optimizing response times by 30% and enhancing backend reliability.
- Designed and managed SQL databases on Microsoft Azure, leveraging SQLAlchemy to boost query efficiency and reduce latency by 25%.
- Collaborated in an Agile/SCRUM environment, actively participating in sprint planning and retrospectives to drive project delivery by 15% faster than initial projections.
- Utilized JIRA for end-to-end project management, reducing task completion time by 20% through enhanced prioritization and tracking.
- Integrated authentication and data validation processes into APIs.

System Administrator

June 2021 - June 2023

University of Maryland Institute for Advanced Computer Studies, College Park, MD

- Worked at the helpdesk and assisted 200+ users.
- Executed comprehensive software and hardware installations and configurations for over 100 workstations, significantly reducing system downtime by 40% and boosting overall team productivity by 25%.
- Developing internal software using Python and the Django Framework to increase the efficiency of various system administrator tasks by 70%.

Certifications

AWS Cloud Practitioner | Databricks Data Analyst Associate

Education

University of Maryland, College Park

Graduated December 2023

Bachelor of Science in Computer Science

Skills

Frontend: React, Next.js, Typescript, Tailwind

Backend: Nest.js, Node.js, Python, Prisma, Django, FastAPI, Express.js

Cloud: GCP, AWS, VertexAI, Gemini, Databricks, Snowflake

AI: Gemini, VertexAI, OpenAI, Databricks
